

What should I wear today?

Pink, red, yellow - or perhaps a nice combination of these colours?

DO YOU LOOK A LITTLE PALE SOMETIMES?

Yes. Even with your dark skin, people may find that you appear a little pallid.

This may be because you're not feeling too bright at the moment, but it may also be caused by the colour(s) of the clothing and/or accessories you're wearing.

A colour analysis can help you find out which colours suit you best. You will receive advice on colours that take your personal preferences and ethnic background into account. Even customers with strong preferences agree - the coloured textiles used in the analysis invariably speak for themselves. You may think that black is your colour, but the analysis indicates that this colour doesn't make you look your best. In this case, a rich golden brown could be a wonderful basic shade, and a great alternative.

You have a right to personal advice!

My name is Monique Bogaards, and my roots are in Benin. Yebba Styling focuses on women who have their roots in Africa, as well as in other countries.

I grew up in the Netherlands, and, because of my background, I have a good sense for what women with coloured or darker complexions are up against in terms of colour choices, clothing and style.
